PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with hands-on experience in data analysis, database design, machine learning, and edge AI through professional engagements, academic projects, and research. Proficient in Python, SQL, MySQL, PostgreSQL, RESTful APIs, and Docker, with a strong foundation in machine learning, deep learning, statistics, and problem-solving. Seeking an AI & Data Engineering internship where I can build data pipelines and AI-powered solutions while continuing to grow as a data professional.

EDUCATION

Daffodil International University **August 2022 – Jul 2026**
B.Sc. in Computer Science and Engineering | **CGPA: 3.42/4.00**

Uttara High School and College **2021**
Higher Secondary Certificate (Science) | **GPA: 5.00/5.00**

Safiuddin Sarkar Academy School and College **2019**
Secondary School Certificate (Science) | **GPA: 4.83/5.00**

TECHNICAL SKILLS

Languages: Python, JavaScript, PHP, C/C++
Frontend: React.js, HTML, CSS, Tailwind CSS, Bootstrap
Backend: Laravel, Django, RESTful APIs
Databases: MySQL, PostgreSQL
Tools & Platforms: Git, GitHub, Docker, Postman, VS Code, Looker Studio, Power BI
Professional Skills: Communication, Problem Solving, Team Collaboration, Leadership, Adaptability
Languages: Bangla — Native | English — Professional Working Proficiency

EXPERIENCE

Trainee RCM Analyst | DocPro **September 2026 – Present**
- Supporting end-to-end US healthcare Revenue Cycle Management, including patient eligibility verification, charge entry, and insurance claim submission.
- Assisting with accounts receivable follow-up and claim denial analysis to identify rejection causes, resolve billing errors, and support timely reimbursement in compliance with HIPAA guidelines.

Laravel Backend Developer | CSE-TECH **Jun 2026 – August**
- Developing the Laravel backend for a client Learning Management System project under Daffodil International University.
- Building RESTful APIs and backend logic for core LMS features including content delivery, progress tracking, and role-based access control.

Web3 Community Manager | BOLOLEX **Feb 2023 – Aug 2023**
- Managed and moderated a community of 500+ members, ensuring consistent engagement and maintaining a positive user experience.
- Collected user feedback and monitored engagement trends to support community initiatives and improve overall member satisfaction.

PROJECTS

JobTracker – Job Application Tracking System GitHub | Live
Laravel, React, Inertia.js, PostgreSQL, Sanctum, Tailwind CSS
- Developed a job application tracking platform where users can create, update, filter, and monitor applications through different hiring stages.
- Implemented authentication, authorization, dashboard analytics, and responsive CRUD interfaces using Laravel, React, Inertia.js, and PostgreSQL.

Object Detection Using ESP32-CAM GitHub
C/C++, Edge-impulse, Esp32, CV
- Built a low-cost edge AI prototype that runs an Edge Impulse object-detection model directly on an ESP32-CAM, performing inference on the device without a separate computer or cloud service.
- Implemented the on-device pipeline of frame capture, JPEG-to-RGB conversion, resizing, inference with a 60% confidence threshold, and live label and confidence output to an OLED display, reaching about 80–85% detection accuracy at about 500 ms per frame.

GhurteJai – Tour Planning & Experience Sharing Platform GitHub
Python, Django REST Framework, Flutter, PostgreSQL, Redis, Docker
- Built a full-stack travel platform for Bangladesh using Django REST Framework with modular apps, PostgreSQL, Redis caching, Celery, Docker Compose, and Nginx.
- Implemented role-based access control, soft-delete, content moderation, voting, bookmarks, nested comments, full-text search, and 20+ REST endpoint groups.

E-Laundry Management System GitHub
Python, Django, Bootstrap, MySQL
- Developed a web-based laundry management academic project for university students, reducing manual effort in booking and managing laundry requests.
- Built a dashboard that allows users to submit requests, monitor order progress, and improve service visibility.

SnapFill – One-Click Form Autofill Browser Extension GitHub
JavaScript, Chrome Extension (Manifest V3), HTML, CSS
- Built an open-source browser extension that fills job applications, Google Forms and sign-up pages in one click, matching 17 standard and custom fields from labels and question text.
- Added note-based CV/document auto-upload, right-click fill and per-site auto-fill, with all data stored locally and passwords never filled.

PUBLICATIONS

- Calibrated Selective Prediction Using Deep Ensembles for Thyroid Nodule Ultrasound Classification Under Dataset Shift ***Under Revision (1st Revision)***
- Measles Outbreak Reporting in Bangladesh, April–July 2026: Analysis of a National District-Level Routine Surveillance Series ***Under Peer Review***
- Shared Lead Exposure in Pregnant Women and Their Young Children in Bangladesh: A National Cross-Sectional Study ***Under Peer Review***

CERTIFICATIONS

Deep Learning Specialization — DeepLearning.AI (2026)
Machine Learning Specialization — Stanford Online (2025)
Python for Data Science, AI and Development — IBM (2025)
Getting Started with Git and GitHub — IBM (2025)

EXTRACURRICULAR EXPERIENCE

Executive Member | DIU Computer & Programming Club **Apr 2025 – Dec 2025**

- Coordinated programming and technology events with fellow executive members, supporting event planning, participant communication, and on-ground execution.

Career Ambassador | Career Development Center (CDC), DIU **Mar 2025 – Present**

- Represented CDC-DIU in career development initiatives; co-organized 3+ career workshops and directly supported 60+ students with career preparation.
